- 2 Format Description 3
 - 2.1 Format Layout 3

1 Introduction

This usage guideline describes the specific details of the OneCSV light file format used to upload Domestic, SEPA and International Credit Transfers.

The file format can be uploaded in the channel:

- InsideBusiness Payments

1.1 General about OneCSV light format

- The OneCSV files sent to ING Bank must use UTF-8 encoding
- The file should contain all columns mentioned in next paragraph, optional means the column does not need to contain data.
- Each row in the file is a transaction
- Domestic, SEPA and International Credit Transfer can be uploaded in the same file, but in case of import with import option Batch this will result in multiple batches.
- The fields are separated by a self-chosen field separator. In *InsideBusiness Payments* -> *General settings*, the used separator has to be set as *Field separator for CSV*.
- This light format does not supported structured address fields and ultimate parties. If these are needed, please use the OneCSV Next Generation file format.

2 Format Description

2.1 Format Layout

Field	Field Description	M/O	Format
1	Remitter IBAN IBAN of ordering account.	M	34 a
2	Remitter currency Currency of ordering account.	M	3 a
3	Remitter bank code Bank code of ordering account.	O	11 a
