The size and composition of ING’s balance sheet determines the regulatory costs, such as Deposit Guarantee Scheme to protect account holders and the Single Resolution Fund to buffer for the financial industry. In addition, a bank levy is charged by each local government as a result of the financial crisis, based at year-end balances of the bank.

As ING is exposed to extra costs in case there are important extra balances placed at year-end, ING reserves the rights to charge a flat fee of 15bps over the extra balances, which are defined as the difference between the aggregated clients year-end balance vs the aggregated client average balances over the period September up to and including November in the relevant calendar year. Local deviations may occur due to local regulations.

Debit rates for Savings Accounts (per annum)

Savings accounts are not permitted to be overdrawn. However, if a savings account is overdrawn, debit interest will be charged at the rate applicable to the current account in the relevant currency. The amount of any such debit interest thus charged will be deducted from any future credit interest.

Notwithstanding any provisions to the contrary in the applicable general terms and conditions, ING reserves the right to modify the operation of the savings account at any time, in particular to limit (i) credit transactions on the savings account to transfers made from any account opened under the same client number in the bank's books in the name of the savings account holder, and (ii) withdrawals from the savings account to transfers made to any account opened under the same client number in the bank's books in the name of the savings account holder.

Cash conversion

Exchange rates used for cash conversions other than payment cards

ING will perform a currency conversion if required by the payment instruction. The conversion cost is included in the amount of the transaction, without prejudice to any additional charges applicable to the aforementioned foreign exchange transactions (page 7). The Bank executes payment transactions for which a currency conversion is required as follows:

-Transactions up to 25 thousand euros: using the independent market standard reference rates published by the Global Market Database (GMDB) each Banking Day at 07:20 am, 11:20 am, 2:20 pm and 5:20 pm, Central European Time*. Payments are processed immediately by applying the rates from the latest GMDB rate update plus a service mark-up. As the market rate used is set four times a day*, this may result in an upward or downward currency risk for the customer compared to the application of a real-time rate.

- Transactions above 25 thousand euros**: using a "real-time ING rate", established using a base rate determined according to the principle of best execution, including a service mark-up***. ING guarantees the principle of best execution by applying the best exchange rate offered by one of its liquidity providers on the foreign exchange market.

Depending on the payment initiation channel used, the exchange rate applied is provided at the time of payment or is available on request, with the customer being invited to request this information. Details of the exchange rate used for specific payment transactions are also available on account statements/reports.

*For SEPA instant payments up to 25 thousand euros, a fifth reference rate(10:00 pm) is loaded on each Banking Day. For payments received or initiated on a Business Day, this rate will be applied between 22:00 and 7:20 on the next Business Day. For payments received or initiated at weekends and on public holidays (25 December and 1 January only), the Bank uses the fifth GMDB reference rate (22:00) available on the last Banking Day preceding the execution day of the instant payment, plus a service mark-up.

**For SEPA instant payments above 25 thousand euros initiated on Banking Days, an indicative exchange rate is used to ensure availability of funds. However, the final exchange rate may vary upwards or downwards, resulting in a forced debit to the account in the event of an insufficient available balance (despite the balance having been deemed sufficient for the instant payment to be executed on the basis of the indicative exchange rate), with the application of the associated charges and debit interest.

***For SEPA instant payments above 25 thousand euros received or initiated on weekends and public holidays (25 December and 1 January only), the Bank uses the fifth GMDB reference rate (10: 00 pm) available on the last Banking Day preceding the execution day of the instant payment, plus a service mark-up. The Bank applies an increased mark-up on all transactions processed over the weekend (up to twice the normal standard mark-up).

Visa credit card conversion rates:

The rate applicable in the case of foreign currency transactions will be:

The Visa International rate (available in branches or at www.ing.lu) + 2% margin

Moreover, for any transaction with a merchant located in a country outside the Europe19 zone as defined by Visa, an additional 0,50% margin shall be added.

Debit card conversion rates:

When making transactions in a foreign currency, the exchange rate is the designated ING Luxembourg rate for V PAY card transactions (information available in your local branch or at www.ing.lu) + an additional 1% fee (0.85% fee for transactions made
