WHAT ARE CASH MANAGEMENT PRODUCTS?

Centralised cash management is a challenging task for companies particularly when they operate world-wide on an international scale.

ING Bank N.V., Milan Branch (ING Bank), under a framework agreement, provides the following range of products to enable its Corporate Customers to have full visibility, access and control over their liquidity across companies, geographies and currencies:

Domestic Cash Balancing: allows to automated sweeps/fundings between Master Account and Participating Accounts in one single country. The Participating Accounts will be funded even if the available balance of the relevant Master Account is exceeded. Guarantee and/or pledge on credit balances could be required;

Cross Border Cash Balancing: allows to automated sweeps/fundings between Master Account and Participating Accounts across multiple countries. The Participating Accounts will be funded even if the available balance of the relevant Master Account is exceeded. A separate guarantee could be required.

ING BMG Funding and Sweeping: Cross Border Cash Balancing having the Master with Bank Mendes Gans

International Cash Funding and Sweeping: allows to automated sweeps/fundings between Master Account and Participating Accounts across multiple countries but a transfer will take place only if the available balance on the (relevant) Master Account is sufficient for that transfer;

Multi Bank Funding and Sweeping: allows to automated sweeps/fundings between an ING account (as Master Account) and a Third Bank account;

Reversed Multi Bank Funding and Sweeping: allows to automated sweeps/fundings between an ING account (as Participant Account) and a Third Bank account;

InterCompany Loan Administration: facilitates the administration of intercompany loans that are created by cash balancing;

Virtual Bank Account Payables and Receivables: a bespoke type of current account that almost instantly sweeps funds to and from a Master Account on individual transaction basis. Virtual bank account structure can be cross-border, as long as the accounts are in the same currency, and multi-entity.

THE MAIN RISKS OF CASH MANAGEMENT PRODUCTS

With regard to the provision of the services, there are no special risks that are not already included in normal banking business, such as staff strikes, etc. The main risk is the unfavourable changes of terms and conditions. However this risk is limited by the corresponding right of relevant Account Holder and Cash Management Coordinator to withdraw from the

agreement within 60 days of the notification of the changes, and to obtain, at the time of termination of such agreement, the application of term and conditions previously applied.

Other risks are related to the loss or theft of identification data and passwords to access the account via Internet, but these risks may be mitigated if the account holder complies with the common rules of caution and care.
